aqwere, obs. f. ACQUIRE.

ar (ɑ:(r)). Name of the letter R.

c **1460** *Pol. Poem* in *Archæol.* XXIX. 331 There was an N and thre arres to-gydre. *c* **1470** *Pol. Rel. & L. Poems* 2 Iij ares for iij Richardes. **1802** MAR. EDGEWORTH *Moral T.* (1816) I. 252 The letter *r*, in this word, was made differently from all the *ars* in the rest of the inscription.

ar, obs. f. ARE (see BE *v.*), and EAR *v.* to plough.

ar, var. AIR *adv.* early; var. HER *pron.* her, their; obs. form of ARR, ERE, OR, OAR, ORE.

†**ar-,** *pref.*¹ The original WGer. form of the prefix, which in OE. was reduced as a proclitic to *a-* (exc. in *ar-æfnan*); OHG. *ar-*, *er-*, *ir-*, mod.G. *er-*. See A- *pref.* 1 and Æ- *pref.* Cf. ARISE.

ar-, *pref.*², assimilated form of L. *ad-* used before *r-*, as in *adrogantia*, *arrogantia*, arrogance. Reduced in OF. to *a-*, which in 14th c. was often re-spelt *ar-* after L., and so usually in Eng. from 15th c.; hence most words from OF. in *ar-* are now written *arr-*, e.g. *arrange*, *array*, *arrive*. In 16th c. this spelling was erroneously extended to words with *a-* from other sources: as *a(r)raise*, *a(r)reach*, *a(r)rear*. See AD- 2.

-ar, *suff.*¹ **1.** of *adjs.* repr. L. *ār-em* (*-ār-is*, *-ār-e*, stem *-āri*) 'of the kind of, belonging to,' cogn. w. *-ālem*, and used where *l* preceded, as in *ālār-*, *stellār-*, *lūnār-*, *regulār-*, *similār-*, *līneār-* or *līneāl-*; hence always with diminutives in *-ul-*, *-ell-*, as *globulār-*, *orbiculār-*. See -AL¹. The regular OF. descendant of *-ārem* was *-er*, later *-ier*, as *singulārem*, *populārem*, *sanglier*, *peuplier*; so *familier*, *régulier*; but later words of literary formation took *-aire* as *angulaire*, *militaire*. In Eng. those adopted from OF. had orig. *-er*, but were afterwards assimilated to L. with *-ar*, e.g. L. *scholār-em*, OF. *escolier*, AFr. *escoler*, ME. *scoler*, now *scholar*. Many words with this suffix have been adapted from L. or F., or formed on L., in modern times; but some of these, through mod.F. use of *-aire* for both *-āris* and *-ārius*, take -ARY; e.g. *military*.

2. of *sbs.* In L. the neuter of adjs. in *-āris*, gave sbs. in *-āre*, *-ar*, meaning 'thing pertaining to,' some of which have come into Eng., through F., as *alter*, *coler*, *piler*, now *altar*, *collar*, *pillar*, or directly from L., as *exemplar* (cogn. w. *sampler* through OF.).

-ar, *suff.*², occas. repr. of L. *-ārius*, *-ārium* (ordinarily repr. by -ER, -ARY). Generally, a refashioning of an earlier *-er* from OF. *-ier*, after the prec., as *bursar*, ME. *burser*, F. *boursier*, med.L. *bursārius*; *medlar*, ME. *medler*, OF. *meslier*, L. **mespilārius*; *mortar*, ME. *morter*, OF. *mortier*, L. *mortārium*; or after the mod.F. in *-aire*, as *vicar*, ME. also *viker* and *vicary*, F. *vicaire*, L. *vicārius*. To the F. forms in *-aire* are due the Sc. *notar*, *ordinar*, *testamentar*, etc. See -ARY².

-ar, *suff.*³, casual variant of -ER, -OR, suffix of agent, and -ER suffix of comparative. Very common in north. dial., as *syngar* singer, *forebear* predecessor, *soutar* sutor; *hear* higher. And in modern Eng. in *beggar*, *liar*, *pedlar*. Probably imitating the refashioned *scholar*, *vicar*, *pillar* for earlier *scoler*, *viker*, *piler*: see -AR¹, and -AR², above.

arbour, -or ('ɑ:bə(r)). Forms: see under the separate senses. [This word has undergone great change of form and signification. Orig. (*h*)*erber*, a. AF. (*h*)*erber*, OF. (*h*)*erbier*, a place covered with grass or herbage, a garden of herbs:—L. *herbārium* a collection of herbs, f. *herba* grass, herb: see -arium. *Erber* became *arber* by a change that was frequent with *-er* before a cons. (cf. *harb, arb, yarb*, obs. or dial. forms of *herb* itself; also *arber, harbour, carve, starve, farm*, etc., and the spoken forms of *clerk, sergeant, Derby, Hertford, Cherwell*); and *arber* was in 16th c. written *arbour, -or*, in accordance with the common scribal interchange of *-er, -our, -or* (cf. *arbiter, -our, sailer, -our, -or*).

These phonetic and graphic changes were facilitated by the change of sense, as the word ceased to be associated with *herb*; the final acceptance of *arbour, arbor*, was probably aided by the natural tendency to connect it with L. *arbor* tree, or It. *arborata* bower. Hence, from *c* 1550, there was a tendency to distinguish *herbour* and *arbour*, restricting the latter to senses 3, 5. Levins *Manip.* (1570) has 'An Arboure, *arboretum*; an Herboure, *viretum, herbaretum*'; also, 'Harboure, *hospitium.*' This last word has also been supposed by some to have influenced the form of *arbour*; but of this there is no trace. Occasional instances of confusion between *arbour* and *harbour* are merely the mistakes of individuals.]

arch, Sc. var. ARGH *a.* *Obs.* timid, pusillanimous.

arch- (ɑ:tʃ; exc. in archangel), *prefix*: repr. Gr. ἀρχι-, ἀρχ'-, comb. form of ἀρχ-ός chief (cogn. w. ἄρχ-ειν to begin, take the lead), as in ἀρχι-διάκονος chief-minister, ἀρχι-επίσκοπος chief-bishop, ἀρχ-άγγελος chief-angel. Hence in later L. *archidiāconus*, *archiepiscopus*, *archangelus*; in OF. *arce-archediacne*, *arce-archevesque*, *arc-archangele*. (In L. the *ch* was treated as *c*; hence, in Romanic, it remained = *k* in *archangelus*; in other words, it became in It. *arce-*, *arci-*, Pr., Sp., Pg. *arce*, OF. *arce-*, later *arche-*; whence G. *erz-*, Du. *aarts-*.)

In OE. at first translated by *héah-* high (*héah-diacon*, *héah-biscop*, *héah-engel*, etc.), but also at length adopted from L. as *arce-*, *ærce-*, *ercе-* (? orig. *arci-*), in *ercе-diacon*, *ercе-biscop*, *ercе-stól* arch-see, *ercе-hád* archiepiscopal dignity. The OE. *ercе-*, *arce-*, became in ME. *erche-*, *arche-*, the latter coinciding with OF. *arche-*, whence also *archangel* was added. From these, in later times, *arch-* became a living formative, prefixable to any name of office. The same happened in med.L. and most mod. langs.; hence many of the Eng. examples, e.g. *archduke*, are adaptations of foreign titles. Since the 16th c., *arch-* has been freely prefixed to names of agents and appellatives (like *arci-* in Ital., and *archi-* in French, as *archifou*, *archipédant*); in a few instances also to appellations of things, and occasionally even to adjectives. Finally, from its faculty of being prefixed to any appellative, *arch* has gradually come to be a separate adjective; see prec. word. (In modern literary words from Gr., the prefix is, in Eng., as in all the Romance langs., ARCHI- q.v.) In pronunciation, the compounds of *arch-* have two accents, either of which may be the stronger, according to emphasis, as in *right hand*. But established compounds, as *archangel*, *-bishop*, *-deacon*, *-duke*, tend to have the main stress on *arch-*, especially when they are prefixed to a name, as, the '*Archduke* '*Charles*, '*Archbishop* '*Cranmer*. As a prefix the usual sense is 'chief, principal, high, leading, prime,' occasionally 'first in time, original, initial,' but in modern use it is chiefly prefixed intensively to words of bad or odious sense, as in *arch-traitor*, *arch-enemy*, *arch-rogue*.

1. a. In titles of office, rank, or dignity: meaning, 'Chief, principal, -in-chief; superior, master-; one who occupies a position or rank above those who bear the simple title'; as ARCHBISHOP, ARCHDEACON, ARCHDUKE; **arch-beadle**, **-brahmin**, **-chaplain**, **-druid**, **-eunuch** (Gr. ἀρχιευνοῦχος), **-gunner** (*obs.*), **-ma'girist** (Gr. ἀρχι-μάγειρος) chief cook, **-mime** (= ARCHIMIME), **-minister**, **-phylarch** chief magistrate of the tribe, **-satrap**, **-visitor**; especially in many titles of offices in the Holy Roman or German empire, as **arch-butler**, **-chamberlain**, **-chancellor**, **-count**, **-cupbearer**; **arch-dapifer**, chief sewer, whose office it was to carry on horseback the first meal to the newly-crowned emperor, whence **archdapifership**; **arch-earl**, **-marshal**, **-sewer**, **-steward**, **-treasurer**,

b. In appellations formed after these, and applied in a similar sense, as **arch-apostle** chief apostle, or chief of the apostles; **arch-chief**, **-corsair**, **-dæmon**, **-emperor**, **-engineer**, **-genethliac** (Gr. γενεθλιακός) chief caster of nativities, **-governor**, **-magician**, **-patriarch**, **-pontiff**, **-primate**, **-prince**, **-publican**, **-regent**, **-ruler**, **-sacrificator**, **-sacrificer**, **-shepherd**, **-vestryman**, **-workmaster**.

archæbacterium (ɑːkɪbækˈtɪərɪəm). *Bacteriol.* Also archæobacterium (*rare*) and with capital initial. Pl. -bacteria. [f. ARCHÆO- + BACTERIUM.] Any of a diverse group of microorganisms similar to ordinary bacteria in size and simplicity of structure, but radically different in their molecular organization.

1977 WOESE & FOX in *Proc. Nat. Acad. Sci.* LXXIV. 5089/1 There exists a third kingdom which, to date, is represented solely by the methanogenic bacteria, a relatively unknown class of anaerobes that possess a unique metabolism based on the reduction of carbon dioxide to methane... The apparent antiquity of the methanogenic prototype plus the fact that it seems well suited to the type of environment presumed to exist on earth 3–4 billion years ago lead us tentatively to name this urkingdom the archaebacteria. **1978** *Jrnl. Molecular Evol.* XI. 246 The archaebacteria include anaerobes, aerobes, autotrophs, heterotrophs, thermophiles, acidophiles, and even photosynthetics... They can be rods, cocci, sarcinae, and spirilla. **1981** *Nature* 1/8 Jan. 95/2 The archaebacteria are a group of prokaryotes which seem as distinct from the true bacteria (eubacteria) as they are from eukaryotes. **1983** *Ibid.* 2 June 381/3 The new bacteria, like other extreme thermophiles, are probably archaebacteria, organisms which, with a long separate evolution from the more cosmopolitan eubacteria, have membranes based on a different design—long-chain ether lipids that span from one surface to the other. **1984** HOLT & KRIEG *Bergey's Man. Systemat. Bacteriol.* (ed. 9) I. 32/1 The *Archaeobacteria*.. comprise the methanogens, halobacteria and thermoacidophiles. *Ibid.* 32/2 The *Archaeobacteria* are distinguished by a number of specialized characters from the rest of the procaryotes ('Eubacteria' has had too many meanings in the past to be a useful term)... But these distinctions are not suitable to kingdom status. **1986** *Nature* 20 Mar. 220/2 The division of the archaebacteria into two branches, methanogens plus halophiles and sulphur-dependent archaebacteria, had been recognized.

Hence **archæbac'terial** *a.*

1971 *Listener* 28 Jan. 120/2 This is Professor Thom's second book on archaeoastronomy, the study of astronomical practices in ancient times (Gerald Hawkins's term 'astro-archaeology', 'star archaeology', is misleading and could well be dropped). **1975** A. 1975 J. E. REYMAN in A. F. Aveni *Archaeoastron. in Pre-Columbian Amer.* x. 205 During the past several years, I have had occasion to read or hear approximately one hundred reports relating to archaeoastronomical research. **1978** *Nature* 7 Sept. 75/1 For some time now there has been a clear need for a book which presents the findings of the 'archaeoastronomers'—and this means mainly Professor Alexander Thom and his family—on the British prehistoric standing stone sites to the informed general public. **1978** *New Scientist* 22 June 825 Nineteen basalt pillars at a megalithic site in northwestern Kenya are aligned towards the 300 BC rising directions of seven star formations of significance in the Cushitic calendar still used in the area today. 1958 COOK& BELSHÉ in *Antiquity* XXXII. 167 (*heading*) Archaeomagnetism: a preliminary report on Britain. **1959** *Times* 7 May 11/4 Archaeomagnetism is based on the

principle that many clays and stones, if heated beyond a certain point..tend to get a fixed magnetism in the direction of the earth's magnetic north at the time they cooled after firing. The earth's magnetic field varies with time in direction, so that the remanent magnetization of a piece of fired clay or stone should be characteristic of some particular time in the earth's history at that place. **1962** *Archaeometry* V. 17 At present the magnitude of the scatter of remanent directions in samples from the same structure is a serious obstacle to attaining the quarter of the century originally hoped for as the dating span obtainable from archaeomagnetism. **1980** *Times* 18 Aug. 14/7 The hearths within the buildings are also being measured for their archaeomagnetism.

aroint, aroynt (ə'rɔɪnt). [Origin unknown. Used by Shakspere, whence by some modern writers.]

1. In *aroint thee!* (? verb in the imperative, or interjection) meaning apparently: Avaunt! Begone!

[Also in *Quentin D.* (1823) II. xix. 364.] **1831** HEIDIGER *Didoniad* IX. 248 Aroynt, thou lingering, long-drawn mortal Strife.

2. Used by Mr. and Mrs. Browning as a vb.: To drive away with an execration.

[The origin of Shakspere's *aroynt* has been the subject of numerous conjectures, none of which can be said to have even a *prima facie* probability. (Cf. also ARUNT.) The following passages are usually cited as pointing to the same word:

RAY *North C. Wds.* (1691) has: *Ryntye*, by your leave, stand handsomely. As '*Rynt you, witch*, quoth Bessie Locket to her mother'; Proverb. *Cheshire*. THORESBY *Lett. to Ray* 1703 (Yorksh. Words) has: '*Ryndta*, used to cows to make them give way, and stand in their stalls or booyses.'

In parts of Cheshire (and ? Lancashire) *ou* (aʊ) is pronounced *ī*, *ȳ* (aɪ)—i.e. (aʊ) has been umlauted to (aʏ), and delabialized to (aɪ); elsewhere it is reduced to (aə), (a(ə)), or (aː)—so that *round* becomes *rȳnd*. *Rynd-ta!* is thus merely a local pronunciation of 'round thee, = move round, move about!' The local nature, the meaning, and form of the phrase, seem all opposed to its identity with Shakspere's *aroynt*.]

2. a. One of the membranous, elastic, pulsating tubes, forming part of the system of vessels by which the blood is conveyed from the heart to all parts of the body.

Among the ancients, the arteries, as they do not contain any blood after death, were popularly regarded as air-ducts, ramifying from the trachea; see prec. sense. Mediæval writers supposed them to contain an ethereal fluid quite distinct from that in the veins, called 'spiritual blood' or 'vital spirits' (cf. ANIMAL SPIRITS), an error which, after Harvey's discovery of the circulation of the blood, only gradually died out.

'*carcioffi, carciocchi, carcioffoli*, hartichokes'), ad. or cogn. w. OSp. *alcarchofa* (mod. *alcachofa*, Pg. *alcachofra*), a. Sp. Arab. *al-kharshōfa* (P. de Alcala) = Arab. *al-kharshūf* (Bocthor and others; but Freytag gives the word with *ḥ*, as *ḥarshaf*).

The phonetic genealogy seems to be: Sp. Arab. *alkharshōf(a*, OSp. *alcarchofa*, (? OIt. *olcarcioffo*), North It. *arcicioffo, arciciocco* (whence Eng. *archychock*), *articiocco*, Eng. *artichock*. Like other words of foreign origin, much influenced in its forms by popular etymology. Association with native words, *arci-* arch-, chief, *cioffo* horse-collar, *ciocco* stump, must have caused the North It. changes; in Fr. the terminal *-chau* was variously assimilated to *chou* cabbage, *chaud* warm, *hoult, haut* high, as *artichau, -chou, -chaud, -chault, -chaut*; the It. and Fr. forms were latinized in the 16th c. as *articoccus, -coctus, -cactus*, all with plausible though delusory etymologies, *cactus* being actually the ancient Latin name of the Cardoon; in Eng., explanations of the name were found in its *choking* the *garden* or the *heart* (*horti-, horty-chocks*), or having a 'chock' or 'choke' in its *heart*. Hence also the change from *-chock* to *-choak, -choke*. As to alleged Arabic *ardi-shaukī*, see Skeat.]

1. A composite plant (*Cynara Scolymus*), allied to the thistles, originally from Barbary and the south of Europe, widely cultivated in kitchen-gardens; its eatable parts are the fleshy bases of the involucral leaves or scales of the gigantic thistle-like flower, and its receptacle or 'bottom,' when freed from the bristles and seed-down or 'choke.'

(According to De Candolle the Artichoke is only a cultivated variety of the Cardoon *C. Cardunculus*, and occurs nowhere truly wild. It was brought to Florence from Naples in 1466. For its introduction to England, see quot. 1599.)

VI. In *Grammar*.

16. A name for the adjectives *the* (Definite Article) and *a, an* (Indefinite Article), and their equivalents in other languages, sometimes considered to form a distinct Part of Speech.

In this sense representing the L. *articulus*, a term used in Latin as early as the time of Quintilian as a transl. of the Gr. ἄρθρον, to denote the Gr. ὁ, ἡ, τό = *the*. The inclusion of *a* and its equivalents belongs to the grammar of the modern languages. Palsgrave (1530) makes two articles in Fr., *ung* and *le*, but he does not seem to know the terms *Definite* and *Indefinite*—which were possibly taken (in a new sense) from the language of the ancient Stoic grammarians who (using ἄρθρα to denote the pronouns) distinguished between ἄρθρα ὡρισμένα or *Definite articles*, and ἄρθρα ἀοριστωδη or *Indefinite articles*; the former being with them our personal pronouns, the latter the other pronouns and demonstratives including the art. ὁ, ἡ, τό = *the*. The exact sense in which ἄρθρον was first used in grammar is uncertain. (I. Bywater.)

-ary[1], *suffix* of adjs. and sbs., ad. L. *-āri-us*, *-āri-um.* The regular phonetic repr. of these in OF. was *-air*, but most of the words that actually lived on into OF. had *-ier* (app. by confusion with words in *-iārium* or *-erium*, of which *-ier* was the regular repr.), in AFr. *-er*, instances of which still remain in Eng. *primer*, *danger*, *antiphoner*, and names of trades and offices, like *carpenter*, *usher* (Fr. *huissier*, L. *ostiārius*), while others, as *bursar*, *calendar*, *mortar*, *vicar*, have recently been refashioned with *-ar* after Latin. But in words of later learned adaptation in Fr., *-ārius*, *-um* were represented by *-aire*; in AFr. and ME. *-arie*, later *-arye*, now *-ary*, as L. *contrārius*, Fr. *contraire*, Eng. *contrarie*, *contrarye*, now *contrary*; and this is the regular form in which L. words in *-ārius*, *-arium*, or their Fr. representatives in *-aire* are now adapted in Eng., and on which new analogical formations are modelled. More than 300 such exist in the language, comprising:—

A. *adjs.* repr. (or on analogy of) L. *-ārius* 'connected with, pertaining to'; as *arbitrary*, *contrary*, *elementary*, *honorary*, *mercenary*, *necessary*, *primary*, *secondary*, *tertiary*, *voluntary*.

B. *sbs.* 1. repr. (or on analogy of) L. *-ārius* 'a man (or male) belonging to or engaged in'; as *actuary*, *adversary*, *antiquary*, *apothecary*, *commentary* (liber), *February*, *January* (mensis), *lapidary*, *secretary*.

2. repr. (or on analogy of) L. *-ārium* 'a thing connected with or employed in, a place for'; as *aviary*, *breviary*, *diary*, *dictionary*, *formulary*, *glossary*, *granary*, *ovary*, *piscary*, *reliquary*, *salary*, *sanctuary*, *vocabulary*. See also -ARIUM.

3. repr. L. (often mediæval) *-āria* (Fr. *-aire*, *-arie*), forming fem. sbs. with same sense; as *Calvary*, *fritillary*.

-ary[2], *suffix* of adjs.; occasional ad. L. *-ār-is* (stem *-āri*) 'of the kind of, belonging to.' Of this the regular repr. in mod. Eng. is -AR[1], q.v. But even in Latin several of these words had forms both in *-āris* and *-ārius*; and in later Fr. words of literary introduction, both these L. endings are levelled under *-aire*, e.g. L. *contrārius*, *mīlitāris*, Fr. *contraire*, *militaire*. Hence, as Fr. *-aire* from *-ārius* gives *-ary* in Eng., Fr. *-aire* from *-āris* has occasionally also been adapted as *-ary* instead of the more regular *-ar*; e.g. *capillary*, *exemplary*, *maxillary*, *military*, *salutary*.

Aryan, Arian ('ɛərɪən, 'ɑːrɪən), *a.* and *sb.* [f. Sanskrit *ārya*, in the later language 'noble, of good family,' but apparently in earlier use a national name 'comprising the worshippers of the gods of the Brahmans' (Max Müller); cf. Zend *airya* 'venerable,' also a national name, and Old Persian (Achæmenian) *ariya* national name (applied to himself by Darius Hystaspes); whence probably Gr. *Ἀρεία, Ἀρία*, L. *Arīa, Aria*, and *Ariāna*, the eastern part of ancient Persia, and Pehlevi and mod.Pers. *Irân* 'Persia.' As a transl. of L. *Ariānus* 'of Aria or Ariana,' *Arian* has long been in English use: *Aryan* is of recent introduction in Comparative Philology, and is also by many written *Arian*, on the ground that *āria* was the original word, as shown by the Vedic language, *ārya* being only the later Sanskrit form; the spelling *Aryan* has the advantage of distinguishing the word from ARIAN in *Eccl. Hist.*

A. *adj.* **1. a.** Applied by some to the great division or family of languages, which includes Sanskrit, Zend, Persian, Greek, Latin, Celtic, Teutonic, and Slavonic, with their modern representatives; also called *Indo-European*, *Indo-Germanic*, and sometimes *Japhetic*; by others restricted to the Asiatic portion of these. *absol.*, the original Aryan or Arian language.

The restricted use rests on the ground that only the ancient Indian and Iranian members of the family are known on historical evidence to have called themselves *Aria*, *Arya* or *Ariya*; the wider application rests partly on the inference that the name probably belonged in prehistoric times to the whole family, while this still constituted an ethnic and linguistic unity; and partly on the ground that even if it did not, it is now the most convenient and least misleading name for the primitive type of speech from which all the languages above-mentioned have sprung, inasmuch as *Indo-Germanic* is too narrow, and *Indo-European* too wide, for the facts, while *Japhetic* introduces speculations of which science has no cognizance. A frequent use of the word, in which all agree, is to distinguish the *Aryan* from the *non-Aryan* languages of India, the former being 'Aryan' whether the term is used in the restricted or the wider sense.

b. *spec.* Of or pertaining to the ancient Aryan people.

The idea current in the 19th cent. of an Aryan race corresponding to a definite Aryan language was taken up by nationalistic historical and romantic writers. It was given especial currency by de Gobineau, who linked it with the theory of the essential inferiority of certain races. The term 'Aryan race' was later revived and used for purposes of political propaganda in Nazi Germany (see 2).

as (æz, əz), *adv.* (*conj.*, and *rel. pron.*) Forms: 1–3 **allswá, al-swá,** (WS. 1–2 **ealswá**). *North.* 2–6 **alswa** (**alsua**), 4–5 **alsa, alse,** 4–7 **als,** 4– **as.** *Midl.* 3–4 **alswo, alsuo,** 3–6 **also,** 4–6 **alse, als,** 3– **as,** (4–5 **os**). *South.* 2–3 **alse,** 2–4 **ase,** 2– **as.** [A worn-down form of *all-so*, OE. *all-swá* 'wholly so, quite so, just so,' which in its simple demonstrative use remains dissyllabic (see ALSO), but as a relative and antecedent has been phonetically weakened through *alswá, alsa, alse, als, as*, and *alswá, alswo, also, alse, ase, as*, to (æz). This phonetic weakening, in each of its successive stages, began with the relative sense, whence it extended to the other senses: even the weak demonstrative was reduced in north. dial. to *als*, but remains *also* in standard Eng. The correlation in 'the colour is *as* bright *as* gold,' where the first *as* is demonstrative or antecedent, and the second relative, 'in *that* degree bright, in *which* degree gold (is bright),' was originally expressed by *so—so*, OE. 'swá beorht swá gold'; but the antecedent or principal form was also strengthened by *all*, '*all swá* beorht swá gold'; constructions which long survived in the south, as 'sō briht sō (se) gold,' and 'al sō (alse) briht sō (se) gold.' The prefixed *all*, though originally emphatic (= *altogether, quite, even*), soon lost its force, and *al-swá, al-so* came to imply no more than the simple *swá, sō*. Hence, by 1200 (in the north) *alswa* had begun to appear in the subordinate clause likewise, '*alswa* brihht *alswa* gold,' a construction soon generally adopted, though almost always with the relative in a phonetically weaker form than the antecedent, e.g. '*alswa* briht *alse* gold, *also* briht *alse* gold, *alse* bri3t *ase* gold, *als* bricht *as* gold,' but finally with both correlatives worn down, '*as* bright *as* gold.' *Alse, ase, as* was even substituted as the relative, when the original *swá, so* remained as the antecedent, whence the mod. 'not *so* bright *as* gold,' OE. ná *swá* beorht *swá* gold, 13th c. southern Eng. 'nowht *so* briht *sŏ* (*se*) gold,' and 'nowht *so* briht *alse* (*ase*) gold.'

With the wearing down of *al-so* to *as*, cf. mod.Ger. *also, als*, in '*also* bald *als* er kam' = ME. '*all-so* sone *als* he com,' mod. '*as* soon *as* he came.'

With many common adjectives and adverbs *as* (*als*, etc.) was formerly written in combination, especially in idiomatic constructions, e.g. *asmuch, aswell, asfaste, assoon, astite*; relics of this survive in *forasmuch, inasmuch, whereas*.]

The uses of *as* are here considered, A. in the main sentence, B. in the subordinate sentence, C. in phrases. At the end of B. are some phraseological combinations originating in ellipsis.

A. In a main sentence, as Antecedent or Demonstrative Adverb.

26. Introducing instances in exemplification or illustration of a general designation: Like and including, such as, of the kind of; for instance, for example.

Apparently an elliptical use of 23, 24; thus, 'a beast of prey, as the lion or tiger' = 'a beast of prey, *such* as the lion

Diefenbach compares Jutlandish *ad-skands*, West Fris. *skân, schean*, which he connects with Du. *schuin, schuins*: see ASKOYNE.

(There is a whole group of words of more or less obscure origin in *ask-*, containing *askance, askant, askew, askie, askile, askoye, askoyne*, (with which cf. *asklent, aslant, asquint*,) which are more or less closely connected in sense, and seem to have influenced one another in form. They appear mostly in the 16th or end of the 15th c., and none of them can be certainly traced up to OE.; though they can nearly all be paralleled by words in various languages, evidence is wanting as to their actual origin and their relations to one another.)]

aslope (ə'sləʊp), *a.* and *adv.* [Evidence is wanting to show the exact history of this, and its relation to SLOPE; prob. it is later form of OE. *aslopen*, pa. pple. of *aslúpan*, lit. 'slipped away' (cf. *awake, acale* = OE. *awacen, acalen*); but it may be f. the simple *slope* adj. (itself apparently = OE. *slopen* 'slipped') with A- *pref.* 2. See SLOPE *a.*

Difficulty attaches to either derivation, as well as to that of *slope* itself, from the want of instances of *slopen, aslopen*, or the verbs to which they belonged, between the OE. period and the 15th c.; the second has the additional difficulty that, so far as evidence goes, *slope* appeared still later than *aslope*, and may have been an aphetic form. *Slope* vb. and sb. are comparatively recent derivatives of *slope* adj. In the absence of evidence, it is impossible to say whether *aslope* is primarily an adverb, like *alive, afloat*, or a participial adjective which only follows its sb., like *awake, athirst*, since these two classes of words run together in use.]

About 1600 the influence of herbalists and horticultural writers made *asparagus* familiar, and this in the aphetic form '*sparagus* at length displaced *sperage*, but was itself by popular etymol. corrupted before 1650 to *sparagrass*, *sparrow-grass*, which remained the polite name during the 18th c. During the present century *asparagus* has returned into literary and polite use, leaving *sparrow-grass* to the illiterate; though 'grass' still occurs in cookery books.]

B. *sb.*

1. A consonantal sound in which the action of the breath is prominently marked; one which is followed by or blended with the sound of H.

(Modern phonologists generally apply the term to a consonantal diphthong consisting of a mute or stop followed by 'the slipping-out of an audible bit of *flatus* or aspiration, between the breach of mute-closure and the following sound' (Whitney), which is believed to be the character of the Sanskrit 'aspirates,' and to have been the *original* value of the Gr. *χ,θ,φ*. But the term is also applied in Gr. grammar to the current *fricative* value of these letters; and in the Roman alphabet generally to any modification of sound indicated by the addition of *h*; e.g. to the Celtic *bh, mh* (= *v*, and nasalized *v*); in Hebrew it has been given to the gutturals, and in other languages it has been used with similar vagueness).

2. The simple sound of the letter H, or its equivalent the *πνεῦμα δασύ*, or *spiritus asper* (') of Greek grammar. *Esp.* applied to the initial *h-* so often 'dropped,' or improperly inserted, by the uneducated in England.

ass (æs), *sb.*[1] Forms: 1–2 **assa**, 2–8 **asse**, 3– **ass** (3–5 **as**, 3 **has**, 4–5 **a nasse**). Pl. 4– **asses**: 1 **assan**, 2–4 **assen**, 3–4 **asse** (*southern*). [OE. *assa* m. has no exact analogue in the cognate langs. OE. had also *ęsol*, app. for *ęsel*, *ęsil*, the common Teut. form, = OS. and OHG. *esil* (mod.G. *esel*, Du. *ezel*), Goth. *asilus*, like the Celtic and Slav. names (OIrish *asal*, Lith. *asilas*, OSlav. *osl*:—**osilu*-) evidently ad. L. *asinus*. From the Celtic was the Old Northumbrian *asal*, *assal*, *assald*, the only form in Lindisf. Gospels (occurs 10 times). Of the latter, *assa* was perh. a diminutive, formed like the dim. proper names *Ceadda*, *Ælla*, *Offa*, etc., which at length displaced the earlier *ęsol*. *Assa* had also fem. *assen*, on the type of *fyxen*, *wylfen*, *ælfen*, which did not survive into ME., where *he-asse*, *she-asse*, occur already in Wyclif. *Jack ass*, *Jenny-ass* are modern familiar appellations.

The reputed OE. fem. *asse* seems to be an error founded on *assan folan* in which *ass* is no more fem. than are *lion*, *tiger*, in *lion's whelp*, *tiger's cub*. The ON. *asna* f., *asni* m. appear to be independent late adaptations of L. *asina*, *asinus*, not actually connected with the OE. The Celtic, Teut., and Slavonic can hardly have been independent adoptions of the L.: the Slav. was apparently taken through Teutonic: was the latter through Celtic? The Ass had no original Aryan name: L. *asinus*, Gr. ὄνος (? = ὄσνος), were prob. of Semitic origin: cf. Heb. *āthōn*, she-ass.]

1. a. A well-known quadruped of the horse kind, distinguished from the horse by its smaller size, long ears, tuft at end of tail, and black stripe across the shoulders. Found wild in western and southwestern Asia, where it has been used from the earliest ages as a beast of burden, and whence, in later times, it appears to have been introduced as a domestic animal into Europe.

(In familiar use, the name *ass* is now to a great extent superseded by *donkey* (in Scotland *cuddie*); but *ass* is always used in the language of Scripture, Natural History, proverb, and fable; also, in oridinary use, in Ireland.)

'a hashish-eater, one addicted to hashish,' both forms being applied in Arabic to the Ismāʿīli sectarians, who used to intoxicate themselves with hashish or hemp, when preparing to dispatch some king or public man. The OF. variants, (pl.) *assacis*, *hassisis*, *haississis*, med.L. *assasi*, *haussasi*, med.Gr. χασίσιοι, point to the Arabic singular, but the form finally established in the European languages arises from the Arab. plural, as in *Bedouin*; cf. also It. *cherubino*, *serafino*, F. and earlier Eng. *cherubin*, *seraphin* (sing.). Naturally the plural was first in use, in the historical sense, and occurred in Eng. in the Lat. or It. form before *assassin* was naturalized: the latter was still accented '*assassin* by Oldham in 1679.]
